INDUCT 300W

AIR SNIPER INDUCT 300W

The most effective solution for supplemental air sanitization! The Induct 300W is a flexible and cost-effective solution that is installed inside of the HVAC system to provide facility-wide protection with more intensity per watt of UVC vs. traditional 18W and 36W lamps. We offer the Induct 300W at 110V, 208V, and BAS Compatible. This solution is safe in environments sensitive to the production of harmful ozone, and is third-party tested and proven to kill 99.9% of airborne pathogens.

STAND-ALONE EQUIPMENT

AIR SNIPER LOW PRO

Protect smaller spaces in the facility from airborne pathogens 24/7 with the Air Sniper Low Pro, designed to sanitize and kill contaminants in the air rather than just filter it. The Air Sniper Low Pro comes with a high-low fan speed, a 60-120 CFM, and a suggested coverage of 1,200 cubic feet. Third-party tested and proven against SARS-CoV-2*, the virus that causes COVID-19!

AIR SNIPER PRO

Protect your facility and commercial space 24/7 from airborne pathogens with UVC technology. The Air Sniper Pro comes with an adjustable fan speed, a 70-130 CFM, and a suggested coverage of 1,300 cubic feet, and 3 photocatalytic elements. Third-party tested and proven against SARS-CoV-2*, the virus that causes COVID-19!

AIR SNIPER ELITE

Protect your facility and commercial space 24/7 from airborne pathogens with UVC technology. The Air Sniper Elite comes with an adjustable fan speed, a 130-300 CFM, and a suggested coverage of 3,000 cubic feet, and 4 photocatalytic elements. Third-party tested and proven against SARS-CoV-2*, the virus that causes COVID-19!

AIR SNIPER ULTRA

Protect your facility and commercial space 24/7 from airborne pathogens with UVC technology. The Air Sniper Ultra comes with an adjustable fan speed, a 300-750 CFM, and a suggested coverage of 7,500 cubic feet, and 5 photocatalytic elements. Third-party tested and proven against SARS-CoV-2*, the virus that causes COVID-19!

IN-LINE EQUIPMENT

AIR SNIPER INFLOW 20/20

Install the best constructed industrial-scale air sanitization equipment with UVC technology in your facility's HVAC system. The Air Sniper Inflow 20/20 has a maximum 2,500 CFM allowance and 3x UVC reflective tunnels. Destroys 99.9% of pathogens!

*We tested with the MS2 bacteriophage, a surrogate of SARS-CoV-2

AIR SNIPER PRODUCT COPY INFORMATION

AIR SNIPER INFLOW 16/36

Install the best constructed industrial-scale air sanitization equipment with UVC technology in your facility's HVAC system. The Air Sniper Inflow 16/36 has a maximum 5,000 CFM allowance and 5x UVC reflective tunnels. Destroys 99.9% of pathogens!

AIR SNIPER INFLOW 36/36

Install the best constructed industrial-scale air sanitization equipment with UVC technology in your facility's HVAC system. The Air Sniper Inflow 36/36 has a maximum 10,000 CFM allowance and 10x UVC reflective tunnels. Destroys 99.9% of pathogens!

*We tested with the MS2 bacteriophage, a surrogate of SARS-CoV-2
